☐ Follow attached: "Check Dropbox App Settings" - Check Occasionally
☐ Follow attached: "Pictures to PC (Using Dropbox)"

Password Help

Make your password at least **10 characters long**.
Use at least **2 uppercase letters**.
Use at least **2 lowercase letters**.
Use at least **2 numbers**.
Use at least **2 special character** (## is recommended).
Don't use stars / asterisks / ***** as your special characters.

Password Example: MRainier75##

By using a word and keeping the special characters at the end of the password, you can write down your passwords, and "hide" certain characters of your written password by using stars (***). You will know that the stars are for hiding the characters, and not part of your actual password.

In this example, the password   MRainier75##   is partially hidden by stars.

EXAMPLE: <mark>Always use a pencil. Don't write in cursive or all capital letters.</mark>

Associated Email	*Recovery Email: spouse@outlook·com*		
Security Question	*Favorite Movie* Answer *Casablanca*	PIN:	

<u>Keep your email address password different from all other passwords.</u>

If you use the same email address (username) <u>and password</u> on multiple sites and one of those sites get compromised or hacked, then the hackers have your email address and email password. Hackers then use the stolen password to access your email account (along with any other site with where you use the same password), steal your list of contacts, and send out spam to your friends. Your friends will think that YOU sent the spam.
